RADIATOR REPAIR

C551B

A NON-METALLIC SOLDER. Use **SUPER HEAVY DUTY RADIATOR CLEANER** to clean your cooling system thoroughly. Use **WATER PUMP LUBRICANT** and **RUST INHIBITOR** to keep it clean.

APPLICATIONS:

- The Original Radiator Repair

DIRECTIONS: Have radiator nearly full of water and start motor. Then gradually pour entire contents of this can into radiator. Circulation of the water will do the rest. Keep motor running a few minutes after leak has stopped.
